SUMMARY

Final-year Software Engineering student at Multimedia University (MMU) with hands-on experience building 5+ full-stack systems using Java, Python, React, and Flask. Currently developing an AI-powered career recommendation platform as a Final Year Project, applying NLP, REST API design, and system architecture skills. Proven team lead across semester-long software engineering projects. Seeking a 3–6 month internship (from July 2026) in software development, QA, or system design.

EDUCATION

Multimedia University (MMU) Cyberjaya, Malaysia
Bachelor of Computer Science (Hons.) in Software Engineering 2023 – Present
• Year 3 | Expected Graduation: December 2026

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, C++, SQL, Dart React, Flask (REST API), HTML, CSS, Flutter
AI & Data	Natural Language Processing (NLP), LLM API Integration, Data Analysis
Software Engineering	OOP, Design Patterns, Agile, Requirements Engineering, Software Testing & Debugging
Databases & Design	MySQL, SQLite, CRUD Operations, ER Modelling, UML (Use Case, Class, Sequence, ERD, Object Diagrams)
Tools	Git, GitHub, VS Code, Postman

PROJECTS

Family Tree Web App / *JavaScript, HTML, CSS* 2025

- Helps families document and preserve multi-generational relationships through an interactive, browser-based tree builder live at amirah50.github.io/family-tree.
- Keeps all data local to the device for privacy, with export support so families can back up and share records without a server or account.

FYP: AI-Based Career Path & Skill Recommendation System / *React, Flask, Python, NLP* 2025 – Present

- Building a full-stack AI web app that analyses student and employee profiles using NLP to generate personalised career pathways and skill-gap insights.
- Designing a modular React frontend integrated with a Flask REST API handling NLP pipelines, recommendation logic, and real-time job market data processing.
- Developing an AI career chatbot, skill-gap dashboard, and progress tracker; validated relevance through questionnaire (20+ students) and focus group interviews with 3 industry professionals.

E-Commerce System (Online Retail Store) / *Java, MySQL, OOP, Design Patterns* 2025 – 2026

- Architected a multi-role retail platform (Customer, Seller, Admin) with role-based access control using the Factory Method pattern.
- Applied Strategy pattern for pluggable payment processing (Credit Card, PayPal) and Observer pattern for real-time order notifications, reducing module coupling.
- Produced complete UML documentation (Use Case, Class, Sequence, ERD, Object Diagrams) covering data flow and system architecture.

ACHIEVEMENTS & ACTIVITIES

Academic Group Leader — Multimedia University 2023 – Present

- Led 4-person teams across 4+ software engineering projects, owning task delegation, code reviews and on-time delivery.

Tech Girls Club, MMU Cyberjaya — Marketing Team Member 2025 – Present

- Contributed to club outreach, digital communications, and event promotion for a tech-focused student society.
